Having CEE sent to you from Ausvita.

100 kg should make:  
120 count bottles – 500 units (45 kg)  
240 count bottles – 500 units (90 kg)

It should be 135 kg coming. They may make me up it to 150 total.

Can we do a 100kg? Its about 132M capsules or so..

You supply material

**Subject:** creatine e2

Creatine E2 120 and 240's don't sell great anymore, but sell enough to be worth having.

What is the minimum run you can do on these to still give me the same pricing?
